

# DEMAND SAFE CHEMICALS FOR ALL

## REDUCE BREAST CANCER RISK AND OTHER HEALTH HARMS

We, the undersigned, call on The Senate Committee on Environment and Public Works to overhaul and update the Toxic Substance Control Act (TSCA) of 1976. We demand strong, comprehensive chemical regulation that protects our health and ensures that all chemicals are proven safe before they enter the marketplace—and our bodies. Industry must bear the burden of proof for safety testing because our health is threatened when chemicals are not safety tested before being used in everyday products. Together, we demand our elected officials enact meaningful chemical safety reform to reduce the risk of a range of devastating diseases and disorders, including breast cancer.
